FUNPLAY™ STRUCTURES

Childforms® FunPlay™ series represents the best value for your park or playground needs. All FunPlay™ modular play structures feature 13 gauge, galvanized uprights with a zinc primer followed by an electrostatically applied, oven cured powder coating. Plastisol coating is .08" - .10" thick and meets all requirements of the CPSIA for lead content. Deck heights range from 12" to 72" and our roto-molded polyethylene slides are offered at either 2' 3' 4' or 6' deck heights (6' spiral slide only).

Childforms® FunPlay™ modular structures feature high pressure cast aluminum clamps with time saving innovations for installers. Childforms® FunPlay™ modular structures also offer unique components and interactive play panels to create the playground of your dreams.

- 3.5" OD POSTS
- 36" SQUARE DECKS

FUNPLAY™ STRUCTURES

Play System Components Overview

FunPlay™ structures utilize a two piece clamp system that provides flexibility in installation. Installation is made simple with the recessed hex that holds the nut in place; a feature that allows the installer to only use a T-40 driver for quicker installation of the clamp. Our clamps have also been designed to prevent movement once installed on the upright post.

Our decks are formed and welded from durable, high strength, 11ga. (.12") steel. Then coated by immersion to ensure 100% coverage, with .08"-.10" thick slip proof, plastisol coating which meets standards of CPSI act of 2008, having less than .1% of critical phthalates.

100% Polyethylene plastic sheets, 3/4" thick, are used for their excellent strength and durability, resistance to delaminating, low moisture absorption, corrosion resistance, and UV stability.

HARDWARE

Stainless steel hardware is used for all components. The bolts have a torx low profile pan head with a nylon patch on the threads eliminating the need for a thread locking fluid. We also incorporate nylon insert lock nuts to prevent bolts from loosening after installation.

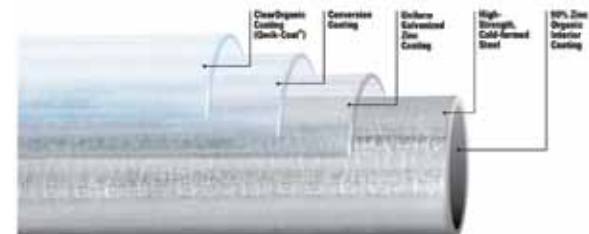

POWDER COATING

Powder coating is applied electrostatically and cured in a temperature controlled oven. A two layer process is used to ensure the highest level of corrosion resistance and bonding. The first layer is a zinc primer applied to 2-3 mils (.002"). The color powder is then applied at 3-5 mils (.003"). UV stabilizers are added for enhanced fade protection.

DESIGN

Our design engineers are CPSI certified and our products are designed around ASTM and CPSC standards. All products are rigorously tested to insure their compliance to the CPSC and ASTM F1487 standards.

TUBES & COATING

We offer both 3.5" and 5" OD upright posts for our FunPlay™ structures. Uprights are 13ga (.095") galvanized Allied Steel with Gatorshield™ for superior strength properties and corrosion protection. Powder coating is added on top for color and added protection.

Panel Options

Childforms® 3.5" FunPlay™ modular play structures feature all new interactive play panels and climbers. **Our Mountain Climber** allows climbing access to our 48" decks while our **Ground Play Store** activity panel allows for enhanced ground play options. All activity panels, other than the Mountain Climber, are available as free-standing ground play too (see p. 25).

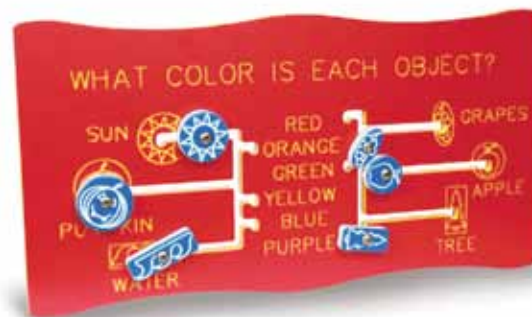

All Panels are available in a choice of Green (Green/Tan/Green or Tan/Green/Tan), or Blue (Blue/White/Blue, or Red/Yellow/Red) plastic.

FUNPLAY™ STRUCTURES

Structure Shade Cover

NEW!

Glide Elbow

With increasing awareness of the harmful effects of the sun and the potential for contact burns on play equipment, we have introduced new, fully integrated shades for our Fun Play Structures.

These shades not only make the playground more safe, they make it more comfortable as well. Our shade cloth can reduce play area temperatures by as much as 20 degrees, and reduce harmful UV rays by 90%.

Our shades are specifically designed to match your play structure, and are the wise choice for a safer more comfortable play area.

Glide Elbow-The glide elbow option for shade structures make cloth removal quick and easy in the event of hazardous weather.

"I had so much fun playing on the playground. The monkey bars were my favorite!"

-Olivia

FUNPLAY™ FITNESS UNITS

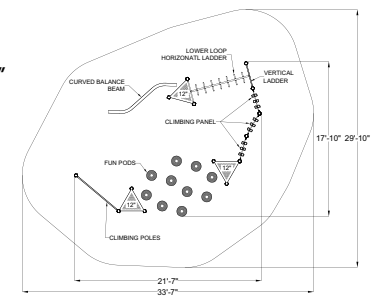

Childforms® FunPlay™ Fitness Units offer you a fun and unique way to promote physical fitness and offer enhanced physical education. Our Fitness Units help develop upper body strength and balance, and provide greater physical challenge than traditional play structures.

DOG PARK

Childforms Dog Parks are one of our newest product lines. We offer a full line of dog play elements to help dogs get exercise, obedience training, and develop their social skills with other canine and human friends. Multiple play elements can be assembled in any configuration to create a doggy obstacle course to promote balance, agility and fitness. Dog park elements are made with the same quality and high strength components as our playground products.

FUNTIMBERS™

US Patent 6,418,675 B1

Funtimers™ - Your answer to permanently maintaining safety surfacing. Funtimers™ have rounded corners and no sharp edges, making them safe for any play area, and unlike untreated wood timbers, Funtimers™ will never rot, decay, splinter or secrete poisonous arsenic.

RECYCLED PLASTIC 

PATENTED
SNAP-IN-SPIKE

8", 9" OR 12" HEIGHTS

10-YEAR LIMITED WARRANTY

WEEP VENTS FOR DRAINAGE

ECONOMICAL

Funtimers™ are the most cost-effective, easy-to-install surfacing containment system for your playground. Funtimers™ are constructed of polyethylene and are extremely durable, yet lightweight, and require far less labor than the conventional wood timber. Once installed, Funtimers™ are virtually maintenance-free. Our 4' length is easier to work with than 6' timbers. This allows for unlimited varieties of design, and requires only 1 spike for secure installation. Our patented snap-in spike enables the Funtimber™ and spike to ship as one unit, which saves you time and money on installation and prevents loss in shipment.

8" FUNTIMBER™ AND SPIKE

Weight 12 lbs.
40 per pallet

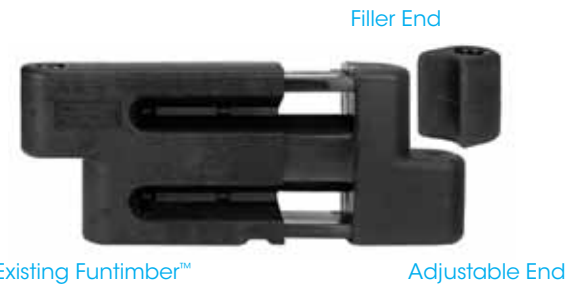

FUNTIMBERS™ Playground Borders

FUNTIMBERS™ ADJUSTABLE END KIT

US Patent 6,418,675,B1

Childforms® Adjustable End Kit contains (2) each Adjustable Ends and Filler Ends. By utilizing our Adjustable End Kit, you are able to modify our Funtimers™ to a length less than 4' as required. For instance, imagine one side of your playground was exactly 38' long. To utilize our Funtimers™; which are each 4' long, you would need (10) 4' Funtimers™ and (1) Adjustable End Kit. You would then cut the tenth Funtimber™ to your exact length needed, and insert the Adjustable End and finish with the filler end. You get a clean, finished appearance which can be installed flush against existing walls, fences, etc... Also, our 8" to 12" conversion kit allows you to use both 8" high and 12" high Funtimers™ on the same playground, effectively saving you time and money in surfacing and installation costs.

Existing Funtimber™

Adjustable End

OTHER USES FOR FUNTIMBERS™

Funtimers™ can also be used for other recreational activity areas, such as beach volleyball pits.

Also try them when planting your next flower or vegetable garden.

PERFECT
for elevated
plant beds!

EXCLUSIVE HOT DIP CURING PROCESS.

ADA/WHEELCHAIR ACCESSIBLE RAMP SYSTEMS

U.S. Patent 6,418,675 B1

Childforms® patented wheelchair accessible ramp system is both cost-effective and easy to install. Designed to be used with our Funtimber™ containment system; the ADA ramp provides convenient access to the playground and helps to establish a clear entry-exit point to your playground. Each ADA ramp system includes (1) mounting log and the necessary spikes for anchoring and takes the place of (1) Funtimber™ around your play area border. The full 8", 9" and 12" ADA/Wheelchair ramps include an entrance and exit ramp; while our flush mount ADA ramp contains an entrance only, and is designed to be used when connecting to an existing sidewalk.

TEACHER'S CADDY & ACTIVITY HOOK

These hooks holds items out of reach until you are ready to use them.

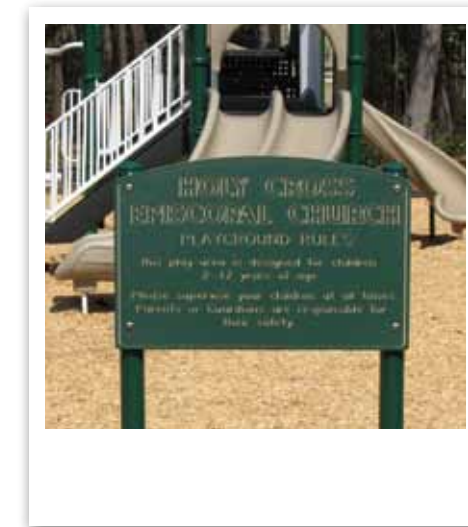

First Aid box – Keeps your tissues, Band Aids and medicine safe, dry and organized.

Teachers' bookshelf - Convenient for your "class room book" and has two coat hooks underneath.

Trash Hanger - Placed at a "child friendly" height this hanger reuses the average grocery store bag.

The Playground Caddie is easy to assemble and has a direct bury footer. All accessories and hardware meet National Playground specifications.

SITE AMENITIES

Shade Structures

Sun protection is an important safety concern on the playground. Our shade material deflects more than 90% of harmful UV rays and has been recognized by the Cancer Association of America. Our shade cloth allows heat to escape while blocking out UV rays, creating a cooler more comfortable shaded environment than solid-sheet roofing material and at half the cost! Our shades are also designed for hassle-free removal of fabric top with the EZ-Glide elbows.

WARRANTY

Childforms® takes pride in offering one of the best warranties in the playground industry. Please contact us for specific warranty information and details. Installation of any playground equipment over a hard surface such as concrete, asphalt or packed earth may result in serious injury or death from falls. Childforms® recommends consulting the CPSC guidelines for surfacing and use zones for public playground safety. Pricing and specifications of Childforms® products are subject to change without notice.

We are Childforms

A Company History

Thank you for taking a moment to review the 2012 Childforms® catalog. This catalog includes many new and exciting products for your park and playground needs. Started in 1995 by two playground representatives, Childforms® was founded on the principal that by offering quality products at a fair price, with excellent customer service, we could set ourselves apart within the playground industry. Sixteen plus years later Childforms® can now provide everything needed to complete the playground of your dreams. While we continue to grow we stay true to those founding principles of offering the highest quality products at a fair price, and offer unparalleled customer service as well as a loyalty rewards program second to none.

In 2010, Childforms® proudly introduced our new 120,000 square foot Operations Facility to better accommodate our growth and product offerings. By offering specific color combinations and products, we are able to keep the majority of our products in stock for immediate shipment. Most QUICK SHIP items can ship within 5-10 days from receipt of order. Please call to confirm availability if a specific ship date is required.

As always, the safety of children is first and foremost in the design and manufacturing of our products. With that in mind, our products contain no phthalates or other toxic substances. All Childforms® products are engineered to meet or exceed CPSC and ASTM guidelines and standards. Thank you again for your consideration of Childforms® products for your playground needs. Feel free to contact us with any questions or to find a local representative of our products. All products may be subject to minor design changes.
