OUTDOOR FITNESS - RECREATIONAL PRODUCTS - ACTIVE WORLD

About

Play4Life is a leading distributor of recreation products, including FITIX outdoor fitness equipment. At Play4Life, we believe that people of all ages and abilities need Play, because it is vital in maintaining a healthy and balanced life. Play comes in all forms of recreation and physical activity, and is not only important for our physical fitness, but also for our cognitive health and emotional wellbeing. All of us here at Play4Life are excited that we can have a part in creating healthy communities through Play.

Our FITIX brand of Outdoor Fitness Equipment is commercial grade and designed to withstand some of the harshest outdoor environments. It is a great solution for creating fitness areas at a park, along a walking trail, for senior living facilities, multi-family housing/communities, military training, and even a line designed specifically for children.

Flexible Design

No matter what your fitness level or goals are, we can design a fitness package to suit your needs. Whether you are wanting a cardio workout, strength-training or a combination, our design staff can create that perfect package.

Designed Tough

Fitix is commercial-grade outdoor fitness equipment, engineered to withstand harsh weather and environments. All materials are environmentally friendly PVC-free and the entire structure is backed by a premium, hassle-free warranty.

- Limited 8-year warranty on posts
- Limited 5-year warranty on moving parts and bearings
- Limited 2-year warranty on any rubber or plastic parts
- Limited 1-year warranty on paint against rust

Quick Ship

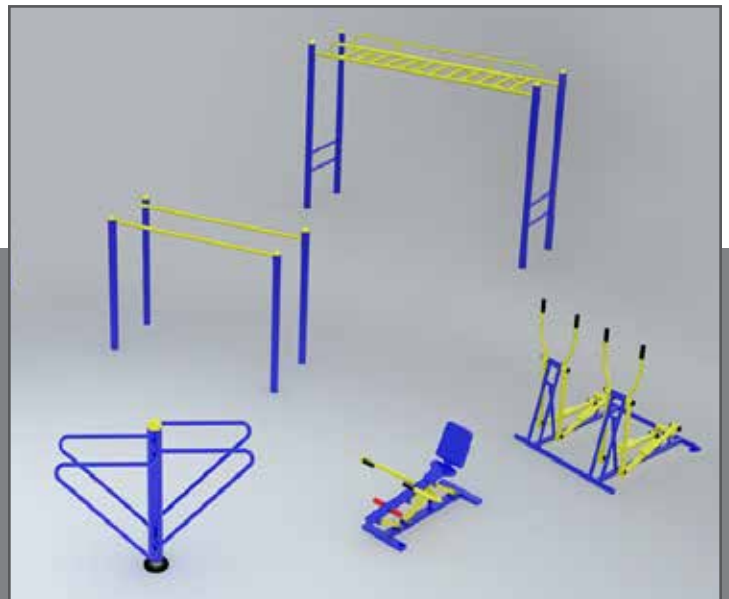

Many of our standard products are available to ship within 1 - 2 weeks. So whether you are in a pinch and need equipment fast to complete your project, or you just can't wait to start to fitness program, FITIX can get you the equipment you need without the long lead times. (Custom products and/or colors do not apply and may take longer.)

Want a Quote?

Two easy ways to get a quote for your Outdoor Fitness Equipment:

1. Contact your authorized FITIX representative.
They are the outdoor fitness experts. Ask how they can help you with site planning, surfacing, installation, and all other aspects of your outdoor fitness equipment building experience.
2. Not sure who your FITIX representative is? No worries! Contact us at sales@play-4life.com or 844-FIT-PLAY and we can assist you with your quote.

Plus you can place your order any day, any time.

Fitness Packages

We offer multi-equipment packages designed for all ages and levels of functional fitness. Packages are ideal if you are seeking an outdoor fitness solution for: a park, fitness trail, hotel/resort, YMCA, multi-family housing or community, senior living facility, and schools.

To see some of our other packages or to create your own, visit us at www.GetFitix.com

Hig Carbon Steel

Composition of 0.55%-0.95% carbon, with 0.30%-0.90% manganese. It is very strong and holds shape memory and resistense. Our manufacturing process is very similar to what you might see from some of the large domestic playground manufacturers. For cutting our stell, we utilize a CNC (Computer Numerical Control) Cutting machine, which helps us improve accuracy, efficiency and production.

Degreaser and Sand Blaster

First we use a non- phosporous degreasing agent to remove all oils. Then comes the rotary automatic high-speed sandblasting machine. This is to de-rust any surface rust, but also helps to eliminate any welding stress and improves the adhesions of the powder coating.

Powder Coating

Our powder coating includes a UV stabilzer, thicker coat of paint over the welds, and then goes through a rigorous 800 Salt Spray Test.

Bearing Diagram

Our bearing is assembled with hydraulic equipment, which avoids being over- tightened before it ships out, is dust and waterproof, and completed with anti- theft/tampering cap.

Surface Mount

Surface mounted using any of the two broad types of anchor systems: post-installed anchors and cast-in-place anchors.

In-Ground Mount

In-ground mounted are embedded into a concrete base, approximately 6-10" below ground level.

Color Combinations

We can match over 250 custom colors. Special colors order fees may apply.

CNC Laser Cutting

Degreaser Sand Blasting

Painting Process
